Fascinating beautiful floors.
For special living spaces.

Creativity
for wellness

Discover the possibilities of design
with our product variety

Premium product characteristics
and colour combinations create exciting floors

Interiors

Discover new floor ambiance for interior spaces

Floor coverings influence our feelings and moods. Consequently, individual design with choice of colours and patterns is crucial for a feeling of well-being in rooms. Combination gives unbound possibilities and free rein to creativity.

Through frequent daily use, floors are the most stressed areas of a building, but are often neglected for decades and their influence on ambiance fades. Premium product quality and characteristics tailored by specific user requirements are therefore crucial for optimum performance and long term appeal. Abrasion, wear and slip-resistance are key performance characteristics for accurate selection of the right system. Whilst colour, texture and shape provide choice and individual expression. The spectrum of opportunity spans from industrial floors to secondary rooms, to living rooms and work rooms.

We offer you a flooring ambiance with long-lasting appeal. Enrich your life with a Coelan Floor.

Enjoy serene moments in harmoniously designed
outdoor areas with quality floors

Outdoor areas

Experience the special floor feeling in outdoor areas

Balconies and terraces are places of tranquility and rejuvenation. This is where we can sit back and escape from the daily routine for precious moments. Here an individual design and long floor service life are the crucial factors for our well-being.

As well as supporting activity and use, outdoor areas are heavily stressed day by day, year by year through exposure to sun, rain, snow and ice, as well as constant temperature fluctuations. Signs of stress manifest through the formation of cracks and crazing in floor coating, often at joints. This leads to moisture ingress which quickly spreads through the underlying screed leading to vapour pressure and frost heave forces. The result is spalling of the screed base and increasing levels of blistering and delamination of the coating system. Clearly the selection of the right floor is crucial. Our selection of coating systems for outdoor areas offers high-quality products that can withstand any weather influences.

In addition to product quality, colours and shapes are also determining factors for a harmonious design. Create tranquil areas with a look that guarantees wellness and thus provides possibilities for living a relaxed and balanced life.

We enable you to design special places under the open sky that will be a source of satisfaction to you for years to come.

An aerial photograph of a vast, golden-brown desert landscape. The sand is marked with numerous tracks, likely from camels or other desert animals. In the upper right quadrant, a large, dark rock formation with a prominent circular opening is visible. The lighting is warm, suggesting a sunset or sunrise, creating long shadows and a rich, textured appearance to the sand.

Australia at your feet

Tracks in the sand, red cliffs at sundown. Unending expanses offer views rich in contrast. Australia, the adventure of the wilderness.

The new perspective
for your floor

With COELAN® Colour Flakes you can take Australian landscapes home. Set accents and combine coloured coatings with 16 different types of Colour Flakes. Whether single-colour, mixed colours, extremely fine, fine or coarse, with marble, terrazzo, or gemstone effect, scattered partial surface or full surface – there are no limits to your fantasy

Discover the new floor feeling.

Colour Flake terrazzo pastel no. 357

Colour Flake ruby no. 342

For your interiors

We offer products for different interior spaces. Our floors are used in private living rooms and work rooms, and in highly stressed industrial environments. The products are persuasive through their high-quality technical features. The new colour worlds allow individual design.

COEPLAN 2-K Poured Coating PLUS

COEPLAN 2-K Poured Coating PLUS, based on polyurethane resins, with or without sealer, with or without scattered Colour Flakes; our flooring systems are used in the highly stressed and creative design area. You can always rely on the right product for the technical features.

Glow-red sunlight illuminates the room

For unforgettable moments.

Technical data

Can be used as a rolled coating, unfilled coating, or filled coating

Low-solvent

Stress-resistant

Abrasion-resistant

Resistant to chemicals

Slip-resistance can be adjusted to suit

Can be combined with 16 grades of Colour Flakes

Wine-red

Colour Flake beige red no. 354

Australia at your feet

For your outdoor areas

We developed the COETRANS® coating system more than 25 years ago for balconies and terraces, arbours, and outdoor stairs. Now with the new colour worlds you create outdoor areas to meet your desires and ideas.

COETRANS®

These coating systems are manufactured on the basis of polyurethane resins and have all the characteristics to satisfy the rigorous requirements imposed on outdoor areas.

Technical data

Light colouring illuminates the environment.
For radiant memories.

A high-angle, aerial photograph of a herd of giraffes running across a dry, golden-brown savanna landscape. The giraffes are in various stages of a gallop, with their long necks extended and legs in motion. Their shadows are cast long and dark on the ground. The terrain is sparse with small, dry bushes and patches of grass. The overall scene conveys a sense of movement and the harsh, natural environment of the African savanna.

Africa at your feet

Dry ground, hot air, shimmering
grassland. Wild animals make us
aware of primeval nature. Africa,
the force of life.

The new perspective
for your floor

COELAN® Colour Flakes bring African moments into the house. Set accents and combine the coloured coatings with 16 different Colour Flakes that can be implemented individually.

Whether single-colour, mixed colours, extremely fine, fine or coarse, with marble, terrazzo, or gemstone effect, scattered partial surface or full surface – there are no limits to your fantasy.

Rushing shadows enliven the environment.
For moving moments.

Natural stone at your feet

Original stone on which we stand.
Its naturalness creates clarity and
precision. Natural stone provides
paths to serenity.

The new perspective
for your floor

Nature and contrast: The extensive colour variety of natural sandstone enables free design space for all floors. Single colours, offset with motifs, and multi-colour contrast mixtures show the harmonious, multi-faceted interplay of the individual stones. Taste and style are presented here.

Discover the new floor feeling.

For your interiors

High-quality polyurethane resins combined with natural stone, (2 – 4 mm grain) bring optimal product characteristics and many design possibilities together. DEKORSTONE DS is the optimal choice for indoor areas such as stairways and also for larger surfaces.

DEKORSTONE DS

Our low-solvent product can be installed with minimal installation height. The high-level stress-resistance and slip-resistance, as well as the fire classification, are additional product advantages. DEKORSTONE DS is also available for rooms with underfloor heating.

Natural elements enrich rooms.

For your outdoor areas

Rounded marble and granite granulates are compounded with primer, sealing layer, and binder to form a mortar system. COETRANS® DS is a near-natural product for outdoor areas such as balconies, terraces, arbours, stairs.

COETRANS® DS

Product characteristics such as, light-resistance, weather-resistance, and temperature resistance and the slip-resistance classification make COETRANS® DS an outstanding covering for outdoor areas. In addition it is capable of withstanding high stress and it has an advantageous drainage effect.

Technical data

Non-fading

Strong effects move the floor.
Time for nature.

An aerial photograph of a desert landscape. The top half shows a vast expanse of bright red sandstone with a textured, undulating surface. The bottom half shows dark, jagged volcanic rock formations with intricate, vein-like patterns. A white rectangular box is centered over the red sandstone area, containing text.

Coloured Quartz at your feet

Smooth quartz in all colours, warm shades. Fascinating combinations shimmer before our eyes. Coloured Quartz brings emotion to light.

The new perspective
for your floor

Design and variety: the different colours and colour blends of the Coloured Quartz make it possible to mix patterns and motifs as desired. The most rigorous requirements imposed on quality and creativity are satisfied, both with the mortar covering and with the scatter application. Thus custom room design takes on a new dimension.

[Discover the new floor feeling.](#)

For your interiors

Our product, DEKORSTONE CQ, is a mortar system that consists of binder and Coloured Quartz; grading curve 0.7 to 1.2 mm. DEKORSTONE CQ offers ideal prerequisites for coloured, unusual design of interior spaces.

DEKORSTONE CQ

Naturally low-solvent DEKORSTONE CQ can be implemented in all indoor areas. High stressability at a low installation height, and the slip-resistance and fire classification perfect the system.

Shimmering light fills the room.
Time to sit back.

For your outdoor areas

COETRANS® CQ & DE is a mortar or scattering system comprised of primer, sealing layer, binder or adhesive layer and Coloured Quartz. The combination of polyurethane resin with Coloured Quartz, (grading curve 0.7 to 1.2 mm), make this system optimal for outdoor implementation.

COETRANS® CQ & DE

COETRANS® CQ & DE is an ideal product for outdoor stairs, balconies, terraces, and arbours, thanks to its resistance to weather and temperature as well as the slip-resistance classification. Jointless installation with simultaneous high stressability and the flexible look offered by two installation variants make COETRANS® CQ & DE an optimal choice.
