

COELAN® Thixotropic Agent

Technical Data Sheet

(Issue: 2015-03-30)

Application areas:

By adding a proportional amount of this product to COELAN® Liquid Plastics and COELAN® Putty, it ensured the thixotropic behaviour when working on vertical surfaces such as wall connections, balcony fronts, etc.

Colour / Degree of gloss:

- white

Product features:

- ready to use

Package size:

1 kg box

Material consumption:

- approx. 0,3 to 8 % (depending on application)

Shelf Life:

Store in closed original containers in dry rooms.

Mixing ration:

- ready to use

Specific gravity:

approx. 43 g/l

Disposal

Disposal when liquid:

/

Disposal when cured:

EAK 08 04 10

Application temperature:

Please refer to technical data sheets of the respective synthetic resin products.

Application Instructions:

- When using a thixotropic agent the processing time of the product will reduce.
- Carefully add a proportional amount of weight % of COELAN® Thixotropic Agent to the respective liquid plastic and mix evenly.
- Careful when pouring the product! The COELAN® Thixotropic Agent is extremely light-weight and can be easily dispersed by a gust of wind when pouring.

For additional information, please refer to the system product's respective Technical Data Sheets and work instructions.

Important notice

Hazard notes, protective measures, hazardous material classes and disposal can be found in the safety data sheet of this product.

The filling quantity of 1 l is approximates 43 g COELAN® Thixotropic Agent.
